COMPANY PROFILE

Delivering Reliable Industrial Solutions With Excellence

Welcome to AGSCO, a trusted provider of integrated industrial services and contracting solutions. We specialize in delivering high-quality civil, electrical, mechanical, and instrumentation services tailored to meet diverse industry requirements across various sectors with precision and reliability.

With a strong commitment to safety, efficiency, and innovation, our experienced team supports projects from initial planning to final commissioning. We ensure dependable execution, advanced technical solutions, and sustainable long-term value for every project we successfully deliver.

About Company

AGSCO is a dynamic industrial services and contracting company delivering integrated solutions across civil, electrical, mechanical, and instrumentation sectors. With skilled professionals & modern technologies, we support projects from concept to completion, ensuring quality execution, safety compliance, operational efficiency, and long-term value for diverse industrial clients.

Company Values:

- **Integrity:** We uphold honesty, transparency, & strong ethical standards always.
- **Quality:** We deliver consistent, high-quality services exceeding client expectations
- **Safety:** We prioritize safety in every operation, ensuring secure environments.
- **Innovation:** We adopt technologies to deliver efficient, modern solutions.
- **Reliability:** We ensure timely delivery with performance and trusted service.

→ Our Mission

Our mission is to deliver reliable, high-quality industrial services and contracting solutions that meet the evolving needs of our clients. We are committed to excellence in civil, electrical, mechanical, and instrumentation works, ensuring safety, efficiency, and innovation in every project. Through skilled professionals, advanced technologies, and strong project management, we aim to support industries with dependable execution, timely delivery, and long-term value, building lasting partnerships based on trust and performance.

→ Our Vision

To become a leading industrial solutions provider recognized for quality, innovation, and reliable project execution.

- Deliver high-quality industrial services with safety & efficiency across all projects.
- Build strong relationships through trust, reliability, & service excellence and support.
- Continuously improve operational standards by adopting technologies enhancing workforce capabilities.

Our Services

01. Electrical & Instrumentation

Electrical and instrumentation solutions ensuring safe, efficient industrial operations.

02. Panel Integration & Automation

Advanced control panels and automation systems enhancing safety, and efficiency.

03. Civil & Infrastructure Works

Reliable construction and infrastructure solutions ensuring safety, and performance.

04. Mechanical & Fabrication Services

Precision fabrication and mechanical services delivering strength, quality, and reliability.

05. Project Support Services

End-to-end project support ensuring smooth execution from development to commissioning.

06. Supply & Logistics Services

Efficient manpower, materials, equipment, and vehicle supply supporting project operations.

07. Industrial & Systems Solutions

Specialized systems improving monitoring, communication, security, and asset protection.

08. Temporary Camp & Facility Services

Complete temporary facilities providing comfortable, functional living and working environments.

Electrical and Instrumentation Services

We deliver electrical and instrumentation solutions covering design, installation, testing, commissioning, and maintenance. Our expertise ensures reliable power distribution, precise control systems, and efficient operations, supporting industrial and commercial projects with high standards of safety, performance, and long-term operational efficiency.

Scope of Work:

- Power distribution systems design, installation, and maintenance for industrial and commercial facilities.
- Lighting systems installation ensuring efficiency and illumination performance across environments.
- Control and instrumentation systems installation, calibration, and maintenance for industrial process.
- Electrical & control cable pulling, routing, dressing, and termination ensuring reliable system connectivity.
- Medium voltage cable splicing performed by SEC-approved technicians ensuring network connections.
- Installation of transformers and package substations delivering efficient power distribution systems.
- Fiber optic cable installation and communication systems enabling industrial data transmission networks.
- Fire alarm, firefighting, and protection systems installation ensuring emergency response readiness.
- Testing, commissioning, and troubleshooting services ensuring systems operate efficiently, & safely.

Advanced Electrical Solutions

We provide integrated electrical and instrumentation services ensuring efficient system performance, operational safety, and reliability. Our solutions support industrial automation, power management, and communication systems with precision, compliance, and long-term operational excellence.

Panel Integration & Automation

We specialize in panel integration and automation solutions, delivering advanced control systems for efficient industrial operations. Our services include design, manufacturing, assembly, and system integration, ensuring safety, reliability, and seamless coordination between electrical, mechanical, and process-driven environments.

Scope of Work:

- **Panel Design** – Design and manufacturing of electrical control panels tailored to meet specific industrial operational requirements with precision, efficiency, and reliability.
- **PLC Automation** – Development of PLC-based automation systems ensuring precise control, real-time monitoring, and improved process efficiency across industrial operations.
- **Panel Assembly** – Professional panel assembly, internal wiring, and functional testing ensuring high reliability, safety standards, and consistent system performance.
- **System Integration** – Seamless integration of control systems with mechanical equipment and industrial processes to ensure smooth, efficient, and synchronized operations.
- **Standards Compliance** – Ensuring full compliance with international electrical standards, safety regulations, and industry best practices across all project implementations.
- **Custom Solutions** – Delivering custom-built automation solutions designed to meet unique project specifications, operational requirements, and long-term performance expectations.

Civil & Infrastructure

Our civil and infrastructure division delivers comprehensive construction solutions focused on durability, safety, and efficiency. We execute a wide range of projects including site development, structural works, road construction, and infrastructure maintenance. With skilled teams and modern techniques, we ensure high-quality results that support industrial, commercial, and large-scale development projects across diverse sectors.

Scope of Work:

1). Site Development

Site preparation and earthworks ensuring stable and properly graded construction foundations.

2). Structural Works

Foundation and structural construction ensuring strength, durability, and long-term project stability.

3). Road Construction

Road construction, paving, resurfacing, and maintenance ensuring smooth and durable transport infrastructure.

4). Building Works

Industrial and commercial building construction delivering functional, safe, and high-quality structures.

5). Fencing Solutions

Installation of security, industrial, decorative, and perimeter fencing systems for protection.

6). Infrastructure Maintenance

Ongoing infrastructure development and maintenance ensuring reliability, safety, and operational efficiency.

Mechanical & Fabrication

We provide high-quality mechanical and fabrication services supported by advanced technologies and experienced professionals. Our capabilities include structural fabrication, precision welding, equipment installation, and maintenance solutions tailored to industrial needs. Utilizing modern CNC and BIM technologies, we ensure accuracy, efficiency, and durability while delivering reliable mechanical systems that meet stringent quality, safety, and performance standards across diverse industrial projects.

Scope of Work

- Structural steel and custom metal fabrication for industrial and commercial applications.
- Advanced welding services including MIG, TIG, SMAW, and FCAW techniques.
- Fabrication of carbon steel, stainless steel, copper, and brass components.
- Pipework installation & mechanical assembly ensuring and efficient system operations.
- Equipment installation, repair, and maintenance supporting safe industrial operations.
- CNC and BIM-based fabrication processes ensuring precision, efficiency, and high-quality project delivery.

Our Capabilities

- High-accuracy fabrication ensuring consistent quality & structural reliability.
- Experienced professionals delivering efficient mechanical project execution.
- Use of durable materials ensuring long-lasting performance and strength.
- Efficient execution ensuring projects completed within deadlines and budget.

Key Advantages

- Skilled professionals ensuring reliable and efficient project execution.
- Extensive expertise across major industrial sectors and operations.
- Consistent assistance ensuring smooth workflow and project continuity.
- Efficient processes ensuring projects completed within defined timelines.

Project Support Services

AGSCO delivers comprehensive project support services covering all phases from initial development to final commissioning. Our experienced, multi-national workforce ensures smooth execution, efficient coordination, and timely delivery across complex industrial projects. We support diverse sectors including oil and gas, petrochemicals, power, and infrastructure, providing reliable solutions that enhance productivity, maintain quality standards, and ensure safe, successful project completion.

Scope of Work

- Site development and preparation ensuring readiness for efficient project execution.
- Construction and execution support supervision, and operational assistance.
- Commissioning and startup assistance ensuring systems operate efficiently.
- Deployment of skilled multi-national workforce supporting diverse industrial project requirements effectively.
- Support services tailored for oil and gas, petrochemical, and refinery industries.
- Project support for cement, power, desalination, and steel plant operations.

Supply & Logistics

We provide reliable supply and logistics services ensuring uninterrupted project execution across industrial operations. Our solutions cover manpower, materials, equipment, and transportation, enabling efficient workflow, timely delivery, and seamless support tailored to meet diverse project requirements.

01

Manpower Supply

We provide skilled, semi-skilled, and unskilled workforce to support industrial projects, ensuring productivity, flexibility, and efficiency with qualified personnel tailored to meet specific operational and project requirements.

02

Material Supply

We supply high-quality safety materials, cleaning materials, consumables, industrial and marine materials, along with electrical and plumbing supplies to ensure smooth operations and reliable project performance.

03

Equipment Supply

We provide a wide range of equipment including cranes, generators, wheel loaders, and heavy and light construction machinery, ensuring efficient operations, productivity, and reliable performance across projects.

04

Vehicle Supply

We offer reliable transportation solutions including buses, boom trucks, flatbed and low-bed trailers, and tankers, ensuring efficient movement of workforce, materials, and equipment for project operations.

Industrial Systems

We deliver advanced industrial systems and specialized solutions designed to enhance operational efficiency, safety, and asset protection. Our expertise ensures monitoring, communication, and system performance across diverse industrial environments.

Scope of Work

- **CCTV Systems** – Installation and monitoring of advanced CCTV surveillance systems ensuring security, real-time visibility, and protection of industrial facilities and assets.
- **Communication Networks** – Design and implementation of communication and networking systems enabling reliable data transmission, connectivity, and efficient coordination across industrial operations.
- **PDHMS Solutions** – Implementation of Plant Data and Health Monitoring Systems providing real-time data analysis, performance tracking, and improved operational decision-making processes.
- **Cathodic Protection** – Installation of cathodic protection systems preventing corrosion, extending asset lifespan, and ensuring structural integrity of pipelines, tanks, and metal infrastructure.

Temporary Camp & Facility Services

We provide fully equipped temporary camp and facility solutions designed for remote and large-scale project sites. Our services ensure comfortable living, efficient operations, and reliable support for workforce productivity and well-being.

Scope of Work

- **Accommodation Units** – Provision of comfortable accommodation units designed to meet workforce housing needs with safety, hygiene, and durability standards for remote project sites.
- **Dining Facilities** – Setup of dining and catering facilities providing hygienic, nutritious meals supporting workforce health, satisfaction, and overall productivity in project environments.
- **Recreation Areas** – Development of recreation areas offering relaxation and leisure spaces to improve worker morale, well-being, and productivity during project operations.
- **Medical Units** – Establishment of medical units equipped to provide basic healthcare services, emergency response, and support for workforce safety and well-being.
- **Admin Offices** – Setup of administrative office facilities ensuring efficient project management, coordination, communication, and operational control within camp environments.
- **Full Support** – Complete camp setup, maintenance, and support services ensuring smooth operations, reliability, and continuous functionality throughout the project lifecycle.
